

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	24 October 2022
Team ID	PNT2022TMID29081
Project Name	Visualizing and predicting Heart disease with interactive Dashboard
Maximum mark	4Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through LinkedIn Registration through Gmail
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	User verification	Verification through CAPTCHA Verification through I'm not a robot
FR-4	User Authentication	Recognition of correct person Resending the code in case of forgot password
FR-5	User validation	Reconfirming the new password Sending a two digit number in (Google account) your Old devices, so that you can enter into a new device By entering the two digit number
FR-6	User Submission	Submission through Google form Submission through Email.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The EHDPs predicts the likelihood of patients getting heart disease. It enables significant knowledge, eg, relationships between medical factors related to heart disease and patterns, to be established.
NFR-2	Security	When it deals with (comes to) health factors, we should provide more security services. There shouldn't be no errors, lagging, base of data of a patient profile, while working on the software or product.
NFR-3	Reliability	Reliability is said to be the measure of stability or consistency of test scores shown in your product. Therefore your product will normal as a good performance one in the field of accuracy

NFR-4	Performance	<p>The performance should be fast relaying.</p> <p>This prediction system should be made available in cloud to ensure better accessibility and setting a milestone in providing good quality affordable healthcare</p>
NFR-5	Availability	<p>The Availability of getting used to this software or product design is through by accessing IBM cognos Analytics and IBM cloud.</p>
NFR-6	Scalability	<p>It is based on the number of users who maintaining the software or a system according to its performance like workflow, increase or decrease in efficiency , response time etc.</p> <p>It scalability can be measured by maintenance, checking in for software updates, fixing errors if occurred in server.</p> <p>By this a good quality of product is determined.</p>
